

## `current_logtalk_flag/2`

### Description

```
current_logtalk_flag(Flag, Value)
```

Enumerates, by backtracking, the current Logtalk flag values.

### Template and modes

```
current_logtalk_flag(?atom, ?atom)
```

### Errors

Flag is neither a variable nor an atom:

```
type_error(atom, Flag)
```

Flag is not a valid flag:

```
domain_error(valid_flag, Value)
```

### Examples

```
| ?- current_logtalk_flag(xml, Value).
```
