

## findall/3

### Description

```
findall(Term, Goal, List)
```

(see the Prolog ISO standard definition)

### Template and modes

```
findall(@term, +callable, -list)
```

### Errors

(see the Prolog ISO standard)

### Examples

To find all solutions in this:

```
findall(Term, Goal, List)
```

To find all solutions in self:

```
findall(Term, ::Goal, List)
```

To find all solutions in an object:

```
findall(Term, Object::Goal, List)
```
