

`current_protocol/1`

Description

```
current_protocol(Protocol)
```

Enumerates, by backtracking, all currently defined protocols. All protocols are found, either static, dynamic, or built-in.

Template and modes

```
current_protocol(?protocol_identifier)
```

Errors

Protocol is neither a variable nor a valid protocol identifier:

```
type_error(protocol_identifier, Protocol)
```

Examples

```
| ?- current_protocol(listp).
```
